

CONTEMPORARY RUSTIC ART

Projects 2017

STANHOLME...An off-grid and unplugged vintage wooden cabin located in ancient Northumberland woodland. What better place to watch climate chaos and the collapse of western civilisation.

TREE CIRCUS...A live 'nature craft' installation artwork situated next to the Public footpath at STANHOLME. In this artwork topiary skills are used to create a botanic circus in which trees perform shapes for our amusement and reflection.

WRITING... 'In Tara we trust'

A broadsheet of 1166 words on two sides of A4 that explores Pixie Tara Buddhism for a broken world. Critical of orthodox Buddhist practice as western, macho and ego obsessed. Buddhists are urged to put their trust in Pixie Tara and help to create a post capitalist and post-industrial eco-Dharma pure land on planet Earth. For free copy please send s.a.e.to address below.

HIS AND HERS PISS BUCKETS... A collaborative audio artwork with Julie Bartley of Rolling Audio. In this work a recording was made each time a piss bucket was used for urination. As an artwork on the human condition 'His and hers piss buckets' highlights our taboo and toxic relationship with shitting and pissing. The result is a 23 minute limited edition CD that is highly suitable for meditation and mindfulness practice. To order please forward £10+£2.50p&p cheque with postal address.

MEDITATION AS ART...Public/private formal meditation as art in one hour slots over the coming days, weeks and months of 2017.
