

CONTEMPORARY RUSTIC ART

Projects 2019

STANHOLME

An off-grid and unplugged vintage wooden cabin (as studio) located in an ancient Northumberland woodland. What better place to observe the unfolding tragedy of Neoliberal climate chaos, mass extinction event and the collapse of western civilisation.

TREE CIRCUS

A live 'nature craft' installation artwork situated next to the Public footpath at STANHOLME. In this artwork topiary skills are used to create a botanic circus in which trees perform spooky shapes for our amusement and reflection.

WRITING

'NATURE CURE POLITICS' is a free pamphlet that claims Global Capitalism needs to be replaced by something better. Think global reforestation and global re-wilding creating a happy, healthy, pacifist, future-fit global civilisation! To obtain a free copy please send s.a.e. to the address below.

MEDITATION AS ART

Public/private formal meditation as art in one hour slots over the coming days, weeks and months of 2019.

PAINTING

An ongoing series of A2 narrative watercolours that explore our post truth and post natural world. (£650 each unframed)

FLOTILLA

Flotilla consists of seven handmade toy sailing ships that will be photographed in and around Whittle Dene burn. Sailing to 'that other shore' the flotilla will be photographed on sacred days using a vintage 35mm camera. The final results will be presented as a series of untouched A2 colour prints. (£250 each unframed)
